Optimised water for maximum coffee taste

With BWT bestcup filters, optimised water for coffee provides a full, perfect coffee taste and protects your valuable appliances from limescale damage. BWT bestcup filters have a special connector and can be easily placed inside the intake adaptor in the water tanks of coffee machines. The unique water optimisation process, using BWT bestcup professional technology, reduces the amount of hardness minerals (calcium content) and provides clear, particle-free water that will not taint the taste or smell of the coffee. BWT water+more high efficiency technology (HET) makes the whole system extremely efficient. Precious minerals remain in the water, providing the best aroma and a perfect crema.

The BENEFITS you gain from BWT bestcup professional technology

- In the professional sector, high filter capacity for maximum efficiency: 50 litres with 10° hardness minerals
- Guaranteed protection from limescale deposits for all types of water
- Perfect coffee quality, guaranteeing satisfied customers every time
- Easy to operate, and fast filter replacement

BWT bestcup professional technology offers easy handling, total protection for your coffee machine and maximum enjoyment for coffee connoisseurs and espresso lovers alike.
