Optimal coffee water to fulfil even the highest requirements

Highest quality coffee water ensures optimal coffee enjoyment and protects high-quality machine technology.

The unique water optimization with BWT bestcup professional technology offers targeted reduction of carbonate hardness (scale content) in the water and provides clear, particle-free coffee water free from unpleasant tastes or odours. BWT bestcup technology ensures highly efficient protection against scale deposits in the coffee machine and improves the taste of espresso and coffee specialities.

Valuable minerals remain in the water and ensure optimal aroma and perfect crema.

BWT bestcup professional technology offers all-round protection for your machine and guarantees optimal enjoyment for all coffee connoisseurs and espresso fans.

BWT bestcup in-line tank filter

Compatible with a wide range of coffee machines, including JURA®, Lavazza®, Saeco®, ILLY® and many other brands.

BWT bestcup fulfils the expectations of even the most discerning coffee connoisseurs and hobby baristas:

Protects you coffee machine from scale deposits

- ensures long service life of high-quality coffee machine technology

Guarantees optimal and consistent coffee quality

- perfect coffee aroma for satisfied coffee connoisseurs

Highest level of efficiency with large filter capacities

- with professional 4-level filtration

Simple to use with no complicated setting procedure

- for quick and easy filter change

Simple use in the water tank

BWT bestcup filter cartridges (1) can be used easily in the tanks of a wide range of coffee and espresso machine via an adapter (2).

A range of adapters are available e.g. for hose (3) or direct connection (4). The water is filtered directly as required (making coffee) and is available right away for your fresh coffee.
